Logistics

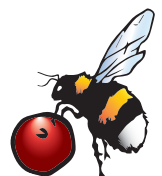

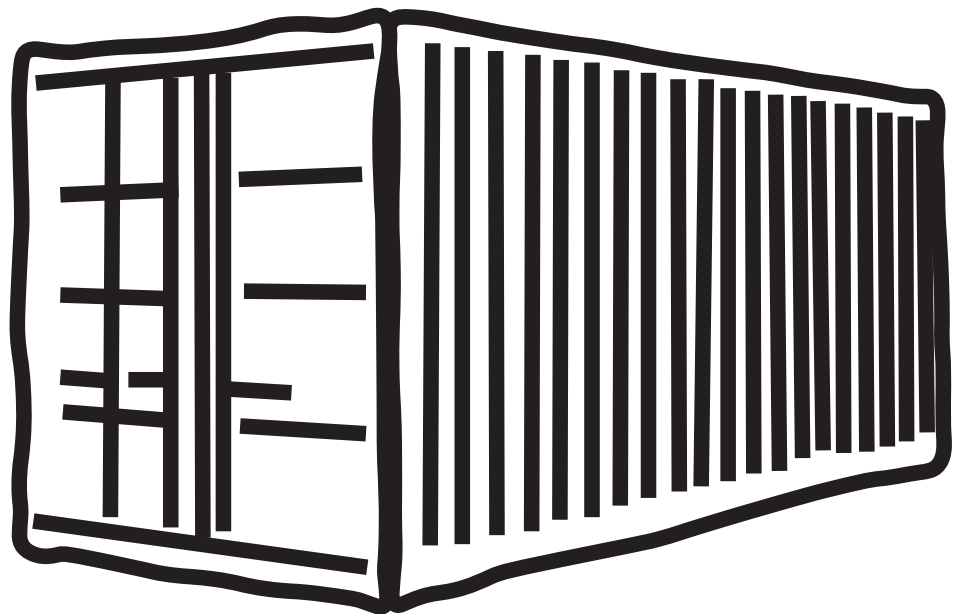

Everyday, we use items that have been made in other parts of the world. Sometimes they are grown on farms far away (like some fruits, spices, tea and coffee) or sometimes they are manufactured in factories in other countries (like electronics and clothing). Once they are ready for use, we have to transport them to consuming countries around the world.

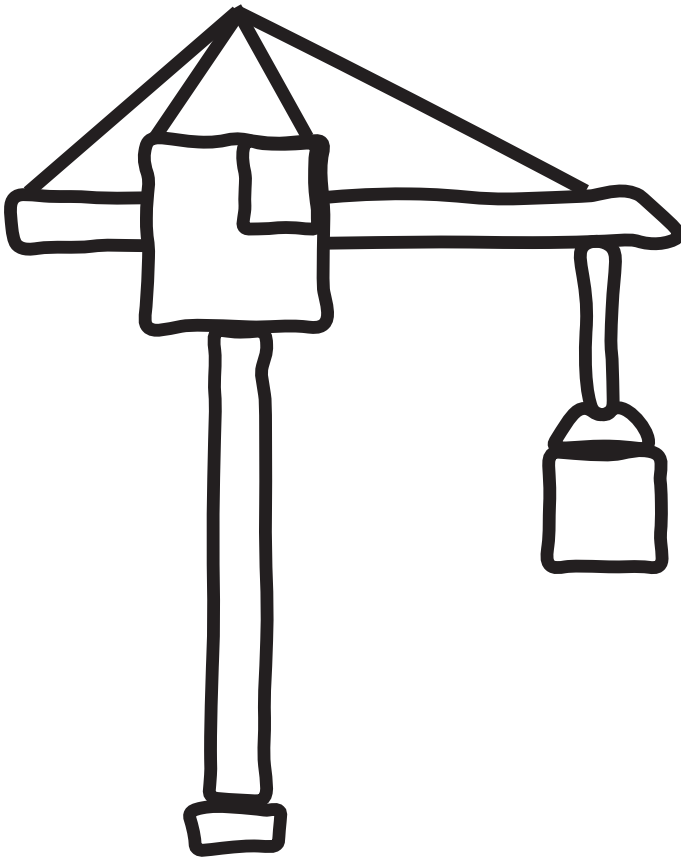

Here you can colour in some of the things we use to move these items around. Have you ever seen any in real life?

Trucks are used
to transport
items on the road

Containers are
used to store items
in when they are
transported by
road or sea

Cranes are used to lift heavy items on and off of ships or lorries

Container ships are used to transport goods on the sea
